

On 15 April we have technical talk which is about entrepreneurship:

The session was delivered by **SANJAY GOPAL**, who delivered special technical talk on entrepreneurship. Firstly he explains about his career opportunity and through the opportunity how he got successes in his life. And he talks about his business type and how they pursue in the business. He conveyed the message that every opportunity is not discriminated in the basis of small and big because opportunities are come in the form of luck. We have to use those opportunity to gain the growth in our career. There business is about light import from china which produces less pollution and protects the environment

From his speech we get knowledge about how we have to use our commonsense and knowledge while selecting the opportunity. He encourages us to start our own business as independently.
